PATIENT AGREEMENT: Well Woman Exam vs. Problem Visit

I understand that my appointment today is for my well woman visit. Insurance companies define the annual well woman exam as a breast exam and pap smear. The annual well woman exam also includes recommended age appropriate screening exams, vaccinations, and labs.

Dr. Mulder and Dr. Hanes wish to provide sufficient time to ensure quality healthcare to their patients. Appointment types are allotted time proportionately to accomplish this goal. The time allotted for a well woman examination is twenty minutes and in general does not allow sufficient time to address problems.

As a courtesy, the doctors will refill **existing** birth control pills or hormone replacement at the well woman visit. **Any changes to these medications or refills of any other medications or discussion of other problems must be done at a separate problem visit.** If you need to change medications or have other issues you would like to discuss with your doctor, we request that you schedule a problem visit for another day.

Thank you very much for your consideration in helping the doctors stay on time.
